UT Southwestern receives Own the Bone Star Performer designation

Thanks to the hard work of the RESTORE Program, **UT Southwestern Medical Center** has received an **Own the Bone Star Performer designation** for **2024-2025**.

This achievement is reserved only for institutions that deliver the highest level of fragility fracture and bone health care.

The RESTORE Program for the institution is directed by Megan Sorich, D.O., Assistant Professor of Orthopaedic Surgery at UT Southwestern. Congratulations on this achievement.

The 2024 Resident Graduation Faculty Awards

This year's **Resident Graduation Dinner** was held for our 2024 graduating class of residents on **Friday, June 14**, at the **Hilton Anatole**.

During the dinner, the Gregory Awards were given to residents and faculty who made a noteworthy impact on the program. The following received major faculty awards:

Harold A. Peter Mattson Award - Philip Wilson, M.D.
Robert W. Bucholz Award - George Liu, D.P.M.
Charles M. Reinert Award - Ed Arrington, M.D.

More kudos

We would also like to recognize the following faculty members for their awards and achievements:

Alexandra Callan, M.D. - new member of the Osteosarcoma Institute Strategic Advisory Board

Alison Cabrera, M.D. - member of the American Shoulder and Elbow Surgeons Political Advocacy Committee

Michael VanPelt, D.P.M. - President-elect of the Texas Podiatric Medical Association 2024-2025

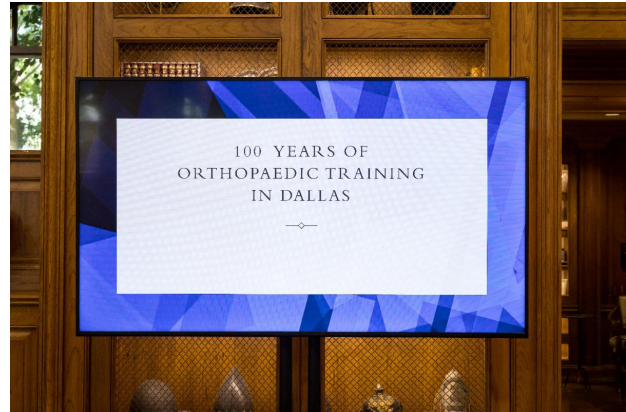

Faculty News

Event Highlights: 100 Years of Orthopaedic Training in Dallas Cocktail Reception

The **100 Years of Orthopaedic Training Cocktail Reception** was held this summer at the **Old Parkland campus** in **Dallas**. It was one of the major events held during our **Resident Graduation Week 2024**.

Current and graduating residents as well as department faculty and alumni enjoyed a great evening celebrating the occasion. This year marks 100 years of our program. The history spans as far back as 1924 before UT Southwestern was established as the institution we know today.

Sex Differences in Knee Arthritis Emerge as Early as Childhood

(Tyler Morning Telegraphy) The knee develops differently in men and women, with sex-specific distinctions in the joint appearing as early as childhood, a new study finds. Taking these differences into account among girls could help prevent knee arthritis for women later in life, researchers say. Gender-based differences in knee cartilage and ligaments develop prior to puberty and can't be explained by sex hormones, researchers reported ...

Pain in the Arm? Tips To Heal Biceps Tendonitis Without Surgery | Orthopaedics and Rehab | UT Southwestern Medical Center

Discover how non-invasive treatments like physical therapy, injections, ice, and anti-inflammatory medications can help heal biceps tendonitis in 75% of cases, plus learn practical tips for preventing injuries. **Amanda Ben Simon, M.M.S., PA-C**, breaks down the best way to healing biceps tendonitis without surgery and tips to prevent this uncomfortable condition.

Research

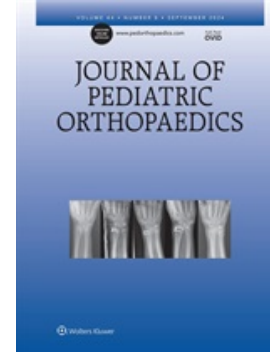

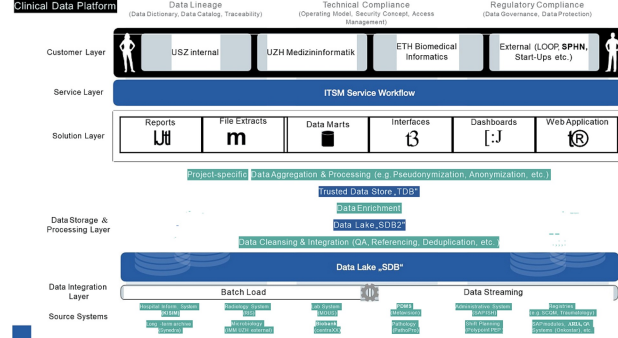

The Department of Orthopaedic Surgery faculty continuously work on research that impacts the field of orthopaedics. Some of their efforts and studies recently recognized in various publications including:

Top Research:

Natural Grass May Pose Greater Risk for Football Concussions

Young football players who sustained a head-to-ground concussion practicing or playing games on natural grass experienced more symptoms - and significantly higher severity - than those who suffered concussions on artificial turf, researchers at UT Southwestern Medical Center found. UT Southwestern Orthopaedic Surgery Professor, and Scottish Rite Faculty Member, **Shane Miller, M.D.**, was one of the authors of this study.

The Role of Big Data Management, Data Registries, and Machine Learning Algorithms for Optimizing Safe Definitive Surgery in Trauma: A Review - Patient Safety in Surgery

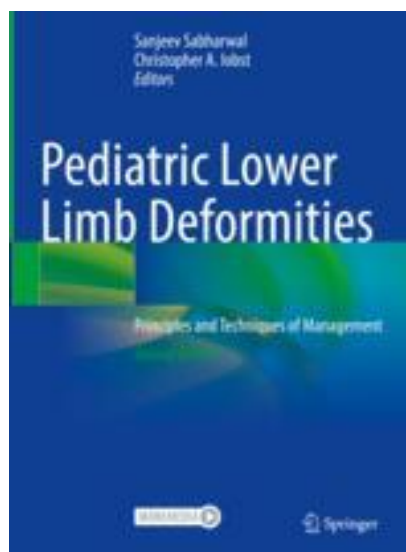

Digital data processing has revolutionized medical documentation and enabled the aggregation of patient data across hospitals. Initiatives such as those from the AO Foundation about fracture treatment (AO Sammelstudie, 1986), the Major Trauma Outcome Study (MTOS) about survival, and the Trauma Audit and Research Network (TARN) pioneered multi-hospital data collection.

Rib-on-Pelvis Deformity and Reported Pain in Neuromuscular Early-Onset Scoliosis

Neuromuscular early-onset scoliosis (N-EOS) often presents with a long sweeping thoracolumbar scoliosis and pelvic obliquity. With severe pelvic obliquity, the ribs come into contact with the high side of the pelvis, termed rib-on-pelvis deformity (ROP). The goal of this study is to evaluate whether ROP is associated with reported pain and other health-related quality of life (HRQOL) measures. We hypothesize that ROP is associated with increased pain and negative HRQOL ...
